Above and beyond. That’s what’s expected of nurses every day.

And for the answers they need every day, they can expect the same from us.

Moby’s Nursing Consult is a comprehensive online reference tool that allows nurses to quickly find the clinical information they need to provide the best patient care.

Moby’s Nursing Consult is a part of Moby’s Nursing Suite.

Fast.

What if a speedy response could affect, instead of fluishing through the body like a virus, nurses can find the information they’re looking for with a few clicks of a mouse. Practice results are related quickly for finding a resource or guidance into the search bar.

Easy to use.

With mobile research and resource capabilities, answers can be made as formal or as informal as needed. Nurses can search the entire site or individual resources to find results related to a specific diagnosis, strategy, treatment, or prognosis.

Accurate.

Context is continuously updated, delivering the most recent information available. Judges can support clinical decisions and help everyone in your organization make the transition from theory-based to evidence-based care.

Always there.

Because it’s an online tool, resources are available 24/7. From any computer, your health care organization is secure. That means nurses can access the knowledge they need, the moment they need it.

Moby’s Nursing Consult connects nurses with more than a reference resource. It connects them with confidence.
